

PROGRAMMABLE DC POWER SUPPLY MODEL 62000H SERIES

Chroma's new 62000H Series of programmable DC power supplies offer many unique advantages for telecom, automated test system & integration, industrial, battery charge & simulation for hybrid cars and solar panel simulation. These advantages include high power density of 18KW in 3U, precision readback of output current and voltage, output trigger signals as well as the ability to create complex DC transient waveforms to test device behavior for spikes, drops, and other voltage deviations.

The 62000H Series includes different models ranging from 5KW to 18KW, with current range up to 375A and voltage range up to 1800V. The 62000H can easily parallel up to 11 units capable of 198KW with current sharing for bulk power applications, for example, battery bank simulation of 450V/150A/67.5KW for electric vehicle and military use.

There are 100 user programmable input status on the front panel for automated test

application and life cycle ON/OFF test. In addition, the 62000H has a 16 bit digital control with bright vacuum fluorescent display readout.

The 62000H series DC power supplies are very easy to operate either from the front panel keypad or from the remote controller via CAN/Ethernet/USB/RS232/RS485/GPIB/ APG. Its compact size with 3U only can be stacked on a bench in a standard rack without any difficulty.

Another unique capability of the 62000H supplies is their ability to create complex DC transient waveforms. This capability allows devices to be tested to DC voltage dropouts, spikes and other voltage variations making them an ideal choice for aerospace device testing, inverter testing and other devices which will experience voltage interrupts. Applications include DC/DC Converter & Inverter voltage drop test, engine startup simulation, battery automated charging,

electronic product life cycle test, etc. **RS-232** RHS2 CAN Ethernet USB GPIB

RS-485

MODEL 62000H SERIES

KEY FEATURES

- Power range : 5KW/10KW/15KW/18KW
- Current range : 0~375A
- Voltage range : 0~1800V/2000V(series)
 - AC input voltage range : 200/220Vac, 380/400Vac, 440/480Vac
 - High power density (18KW in 3U)
 - Easy master/slave parallel & series operation
 - Precision V&I measurements
 - High-speed programming
 - Voltage & current slew rate control
 - Digital encoder knobs, keypad and function keys
 - Current sharing operation
 - Voltage ramp function (time range: 5 ms ~ 99 hours)
 - Auto sequencing programming: 10 programs/100 sequences
 - OVP, current limit, thermal protection
 - Standard analog programming interface
 - Support CAN/Ethernet/USB/RS232/RS485/ **GPIB/APG** interfaces
 - Remote output ON/OFF (I/P)
- Remote sense line drop compensation
- LabView and Labwindows
- Solar array simulation function
- Shade I-V curve simulation
- I-V curve programming:
- 10 program/100 I-V files
- CE Certified

Chroma

HIGH POWER DENSITY 18KW IN 3U PROGRAMMABLE DC POWER SUPPLY

The 62000H Series supplies offer a high power density envelop of maximum 18KW in 3U, deliver low output noise and ripple, excellent line and load regulation, and fast transient response. With wide range of voltage (30V~1800V), current (30A), suitable for every part of your manufacturing process from design to production testing.

WIDE OPERATING REGION FOR OUTPUT (62000H-P SERIES)

The 62000H-P Series are equipped with active PFC low-current harmonic feed to grid, which can save power consumption and power system configuration under high-power testing. The 62000H-P has a wide operating region of output for users to operate in a broad voltage and current range at rated power that is not limited to a single operating point of full power. It is suitable for testing the products with diverse specifications such as electronic components, server power, battery application products, and automotive electronic components, etc. For instance, the model 62180H-1800P with 1800V/30A/18kW output can be operated flexibly in various combinations as shown in the figure.

AUTOMOTIVE ELECTRICAL CHARACTERISTICS SIMULATION

The 62000H Series DC power supply has a high-speed CV dynamic response with controllable slew rate up to 40V/ms. It can be applied to many automotive regulations for electrical characteristics testing, including LV148, LV123, ISO 16750-2, VW 80000, GS 95024-2-1, etc., to perform dynamic voltage testing on automotive components and electrical systems during start-up and operation. Moreover, the graphical softpanel allows users to test with one click to quickly verifying the product stability, and saves the development timeline. (For detailed support items, please refer to Chroma's official website - Chroma Softpanel for Model 62000P & 62000H Series).

MASTER / SLAVE PARALLEL & SERIES OPERATION

When high power is required, it is common to connect two or more power supplies in parallel or series. The 62000H Series supplies have a smart Master / Slave control mode making series/parallel operation fast and simple. In this mode, the master scales values and downloads data to slave units so programming is simple and current sharing automatic.

PROGRAMMING SEQUENCES APPLICATIONS

The 62000H Series supplies' LIST and STEP modes allows for auto sequencing function. The LIST mode allows for 100 user programmable sequences with time settings ranging from 5ms to 15000s and voltage / current slew rate control. The STEP mode allows for setting start, end voltage and run time of 10ms to 99 hours for automated test applications. Applications include DC/DC Converter & Inverter voltage dropout testing, engine start-up simulation, battery automated charging, battery voltage dropout simulation, product life cycle testing and avionics testing.

PANEL DESCRIPTION

5KW/10KW/15KW MODEL

18KW MODEL

- 1. POWER Switch
- 2. VFD Display
 - Display setting, readings and operating status
- 3. LOCK Key
- Lock all settings
- OUTPUT Key Enable or disable the output
 CONFIG Key
- Set the system configuration
- 6. VOLTAGÉ Key
- Set the output voltage 7. CURRENT Key
- Set the output current
- 8. PROG Key Program the sequence
- 9. NUMERIC Key Set the data
- 10.ROTARY Key
 - Adjust the V&I and set the parameter

- 11. Analog programming interface For analog level to program and monitor output voltage & current
- 12. RS-232 or RS-485 Interface (alternative)
- 13. System Bus
 - For master/slave parallel and series control
- 14. USB Interface 15. OUTPUT Terminal
 - Connect the output cable to a UUT
- 16. System Fan With fan speed control
- 17. Current Sharing Terminal
 - Connect the cable to slave unit
- 18. Sense TerminalConnect the UUT for voltage compensation19. GPIB or ETHERNET Interface
- (Option for 2kW/5kW/10kW/15kW models)
- 20. GPIB Interface (Option for18kW model)
- 21. Ethernet Interface (Standard for 18kW model)
- 22. AC Input Terminal

ORDERING INFORMATION

Power Rating	62000H Series Programmable DC Power Supply					
2KW	62020H-150S : Programmable DC Power Supply 150V/40A/2KW with Solar Array Simulation					
5KW	62050H-40 : Programmable DC Power Supply 40V/125A/5KW					
	62050H-450 : Programmable DC Power Supply 450V/11.5A/5KW					
	62050H-600 : Programmable DC Power Supply 600V/8.5A/5KW					
	62050H-600S : Programmable DC Power Supply 600V/8.5A/5KW with Solar Array Simulation					
	62075H-30 : Programmable DC Power Supply 30V/250A/7.5KW					
	62100H-30 : Programmable DC Power Supply 30V/375A/11KW					
	62100H-40 : Programmable DC Power Supply 40V/250A/10KW					
10KW	62100H-100P*3 : Programmable DC Power Supply 100V/250A/10KW					
IUKVV	62100H-450 : Programmable DC Power Supply 450V/23A/10KW					
	62100H-600 : Programmable DC Power Supply 600V/17A/10KW					
	62100H-600S : Programmable DC Power Supply 600V/17A/10kW with Solar Array Simulation					
	62100H-1000 : Programmable DC Power Supply 1000V/10A/10KW					
	62150H-40 : Programmable DC Power Supply 40V/375A/15KW					
	62150H-100P*3 : Programmable DC Power Supply 100V/375A/15KW					
	62150H-450 : Programmable DC Power Supply 450V/34A/15KW					
15KW	62150H-600 : Programmable DC Power Supply 600V/25A/15KW					
	62150H-600S : Programmable DC Power Supply 600V/25A/15KW with Solar Array Simulation					
	62150H-1000 : Programmable DC Power Supply 1000V/15A/15KW					
	62150H-1000S : Programmable DC Power Supply 1000V/15A/15kW with Solar Array Simulation					
18KW	62180H-1800P : Programmable DC Power Supply 1800V/30A/18KW					
	62180H-1800S : Programmable DC Power Supply 1800V/30A/18KW with Solar Array Simulation					
Options	A620024 : GPIB Interface for 2kW/5kW/10kW/15kW models (Factory installed)					
	A620025 : Ethernet Interface for 62000H series (Factory installed)					
	A620026 : Rack Mounting kit for 62000H series					
	A6200039 : GPIB Interface for 12kW/18kW models					
	A632013*4 : CAN interface for 62180H-1800P					

Note *1 : All models output power are available for 200/220Vac, 380/400Vac and 440/480Vac (600V/1000V models) line voltage.

Note *2 : Call for availability. (30V/40V/100V/450V for 200/220 Vac and 440/480 Vac line voltage)

Note *3 : 62000H-P models include active PFC and constant power envelop operation. Note *4 : Call for availability.

Note*1 : Max. Power is 20kW for 62020H-150S. Get more product & distributor information in Chroma ATE APP	Irig. Source							
	Note*1 : Max. Power is 20k	W for 62020H-150S.		Get n	nore product & distrik	outor information in C	hroma ATE APP	

Note*2 : There is parallel mode for DC power supply when the I-V curve function is enabled. Note*3 : For higher power > 198kW, please call for availability. Note*4 : Recovers within 1.5ms to \pm 1.5% of steady-state output

for a 50% to 75% or 75% to 50% load change (0.1A/ms)
