

FIBER TO THE ANTENNA (FTTA)

TRAINING

Overview

- Introduction to Fiber Optics
- Fiber Principles
- Fiber Identification
- End-Face Cleaning & Maintenance
- Antenna & Wireless On-Site Testing
- Hands-On Practice

**2.5 hours of lecture, 2 hours of hands-on practice*

After completing the course, you will be able to demonstrate the specialized knowledge required to test fiber to the antenna (FTTA) and wireless systems. This training includes lecture on general fiber optic knowledge, the newest trends in the industry, and hands-on training for end-face inspection and cleaning, insertion loss test with loopback, and OTDR tests.
